

APCTT-CSIR Workshop on Technology Commercialization and Transfer

1-3 November 2017 • Ghaziabad, India

Knowledge Networks for Technology Transfer and Commercialization

Satyabrata Sahu, Ph.D.

Coordinator – Technology Intelligence

Asian and Pacific Centre for Transfer of Technology (APCTT) of the

United Nations Economic and Social Commission for Asia and the Pacific (UN ESCAP) in New Delhi, India

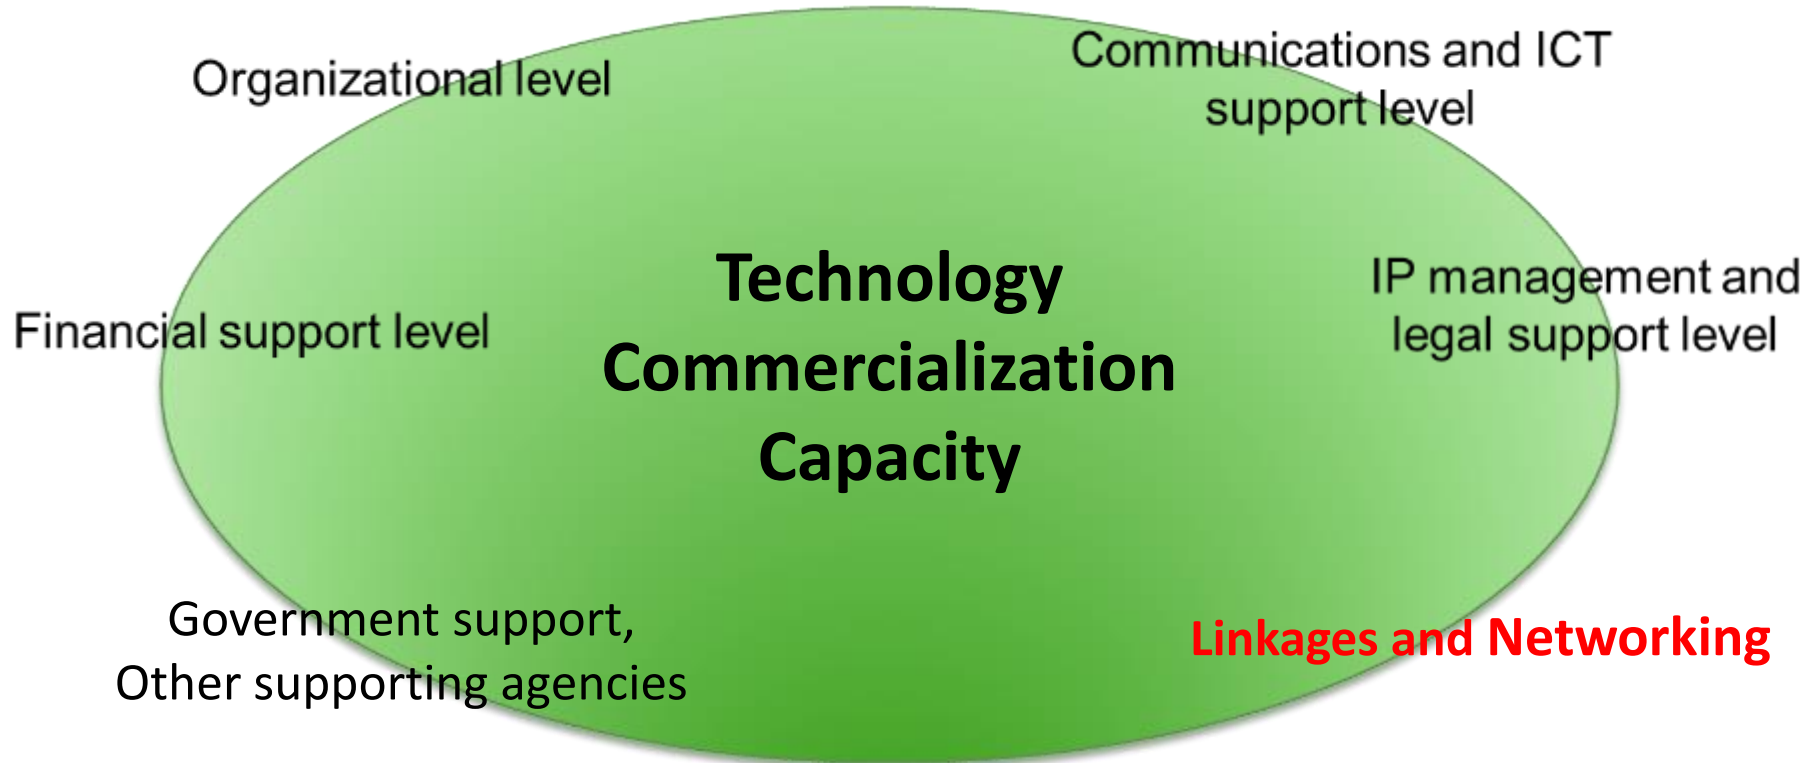

Outline

- Networking for technology transfer
- University-Industry partnerships
- Networking channels and linkages
- Knowledge transfer and knowledge networks
- International participation and networking
- Web-based tools and platforms for networking
- Concluding remarks

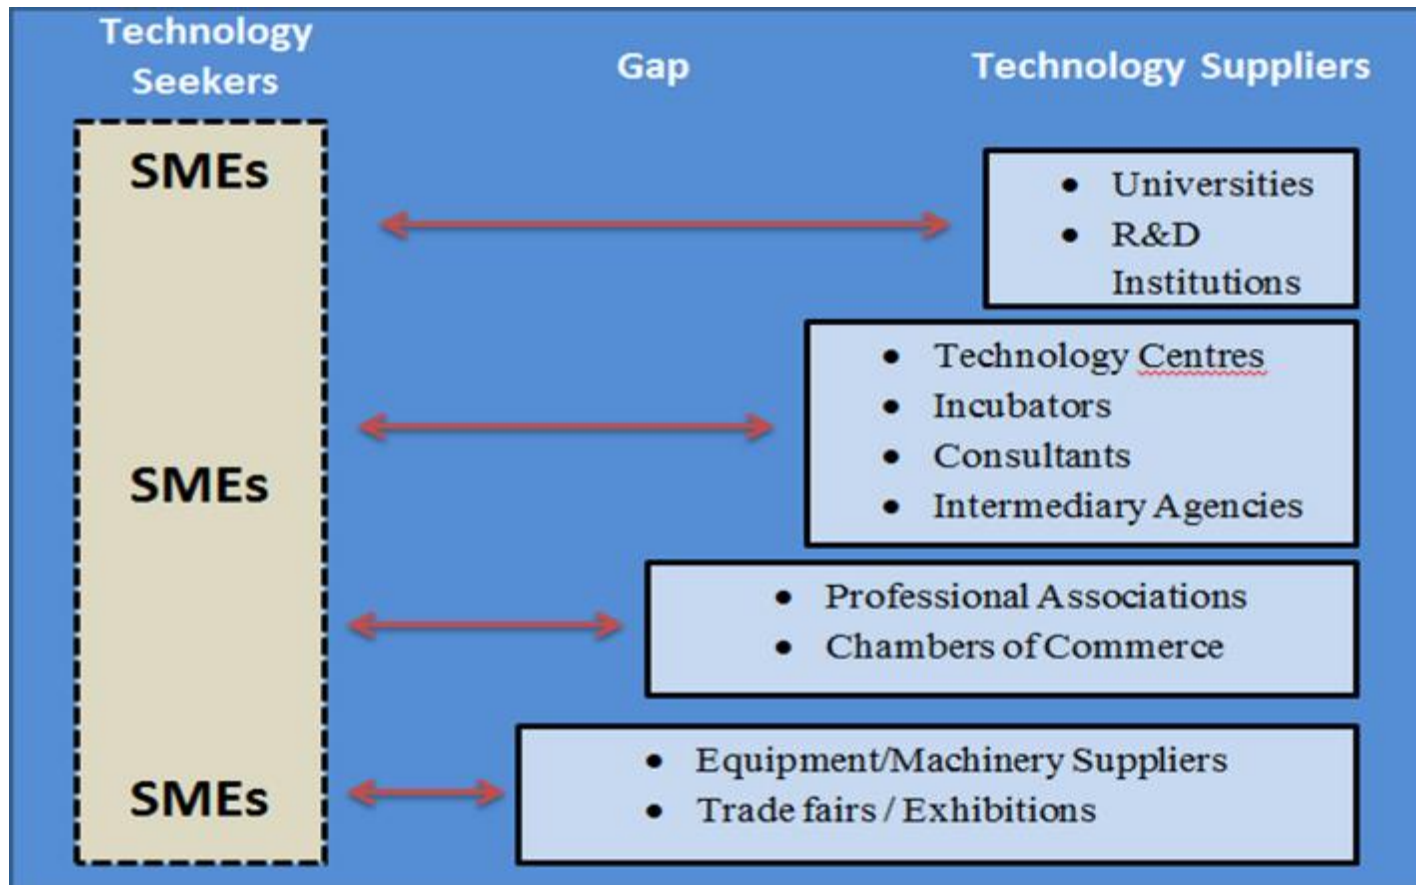

Networking in the Context of Technology Transfer

- Technology Transfer is a complex and long drawn-out process
- Issues related to administration, planning, management, marketing and implementation
- The problems are generally attributed to the **lack of systematic planning, control, monitoring, decision-making and Networking.**

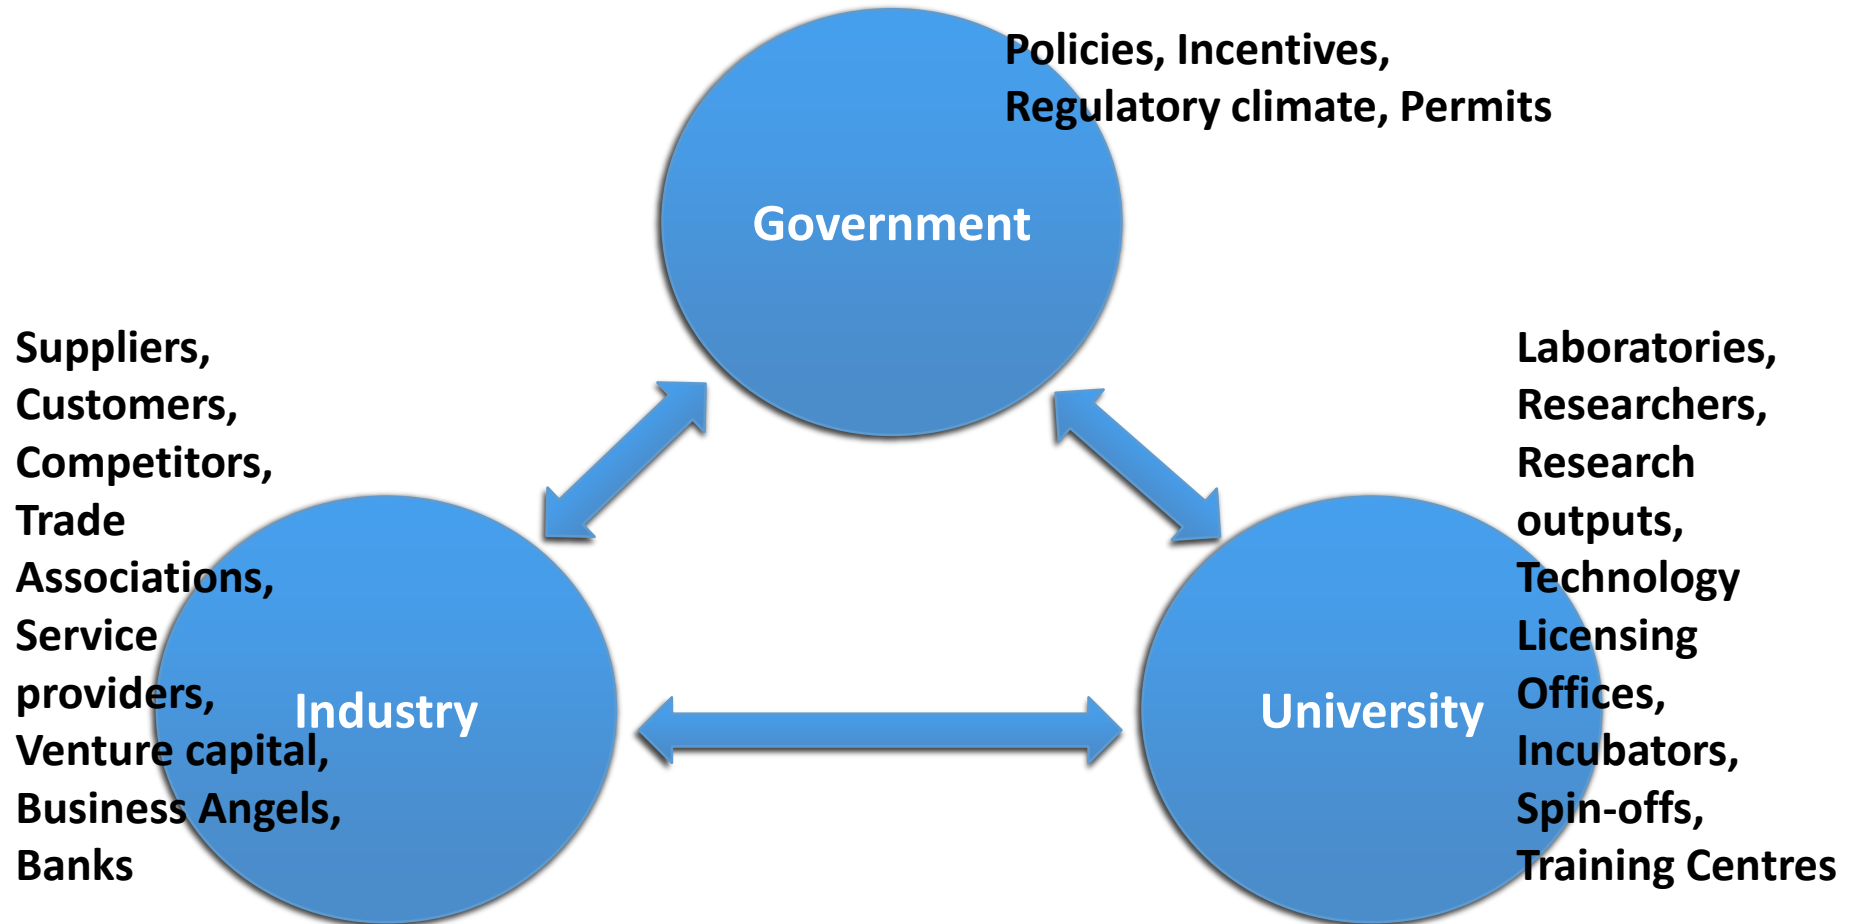

Strengthening Technology Commercialization Capacity

Networking to Bridge the Gap

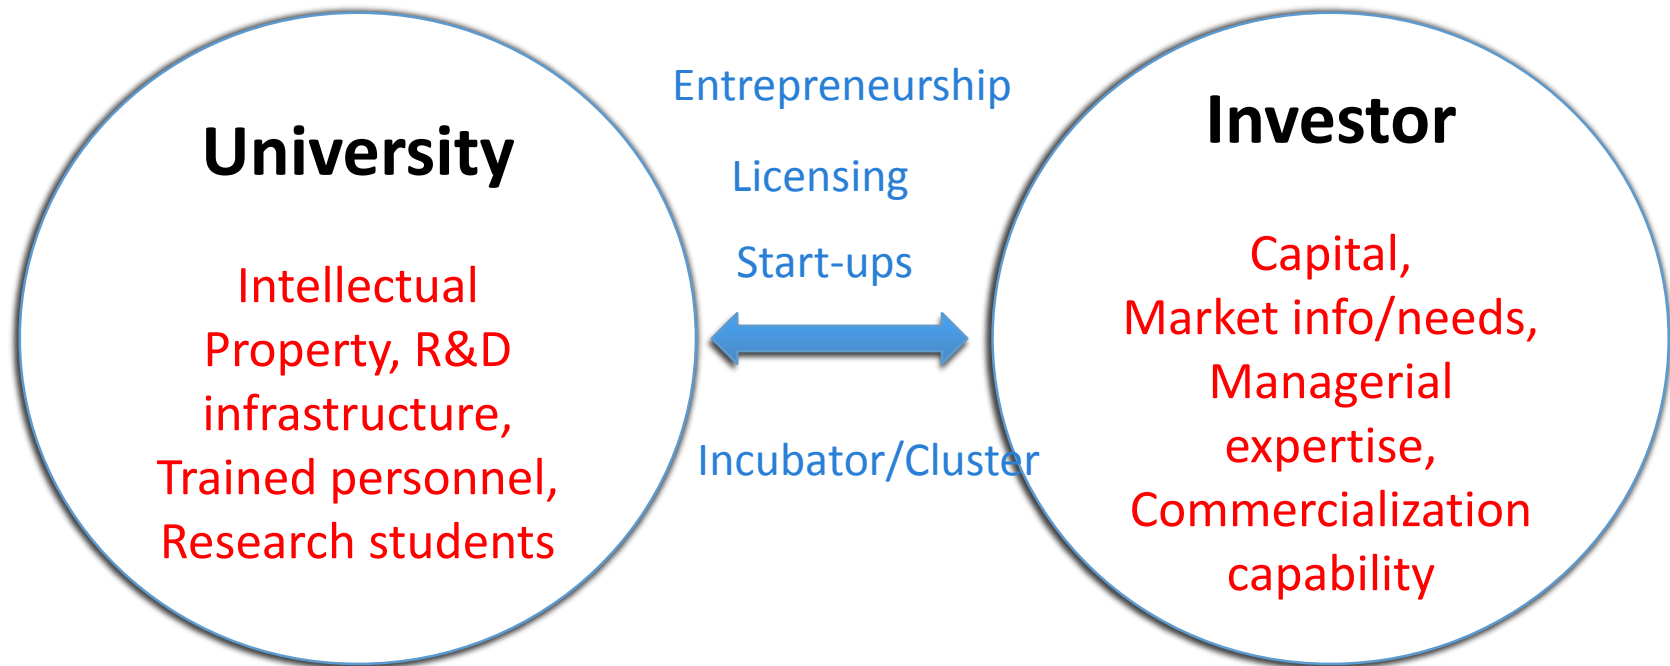

Networking in the Triple Helix

Networking Channels and Linkages

- Membership of associations, networks (online, offline)
- Technology Business Incubators – Science parks, Innovation centres, Technology incubators, etc
- Technology Transfer / Licensing Offices
- Conferences, Seminars, Workshops, Field visits, Study tours
- Technology data banks
- Strategic alliances at national, regional and international levels
- Availing services of Tech Transfer and Innovation promotion agencies

Academic/University Entrepreneurship

Stanford, Purdue, MIT and Cambridge have been particularly successful in commercializing research and nurturing start-ups.

Towards More Entrepreneurial University

Recruit star faculty – (a) Engaged in activities beyond research and teaching; (b) Possess strong publications and citation records; (c) Command a position in the university hierarchy; (d) Display qualities of a role model; (e) Possess business education and experience

Develop links with industry – (a) Research projects sponsored by industry; (b) Industry consulting; (c) Setting up university startups for commercial exploitation of research; (d) Licensing of patents

Create an appropriate incentive structure - Appropriate rewards and incentives to motivate faculty and students to innovate, network and connect with industry.

University-Industry Partnerships

- **Research partnership:** performing collaborative R&D
- **Research services:** contract research, consulting, financing of university research by firms
- **Human resource transfer:** Personnel requirement of industry, training industry employees, internships
- **Training:** Joint training with industry
- **Academic entrepreneurship:** Development and commercial exploitation of technological innovations by university faculty and students through forming startups
- **Commercialization of IP:** Patents licensing to the industry
- **Informal interaction:** Social relationship, networking, conferences
- **Scientific publications:** Joint publications in journals

Perkman & Walsh, 2007

University-Industry Collaboration - An MIT Case Study

CIRRELT, 2015-22

Knowledge Transfer – Key to Networking

Knowledge is a Critical Asset

“Knowledge transfer (KT) is a term used to encompass a very broad range of activities to support mutually beneficial collaborations between universities, businesses and the public sector.” (University of Cambridge)

The University of Cambridge supports knowledge transfer to make the most of research using a multi-pronged strategy through:

- People – Research personnel, students, student projects
- Publications and events
- Collaborative research projects
- Consultancy
- Licensing of research outputs
- Formation of new businesses

Knowledge Networks

- ❑ **Key drivers** in today's dynamic business settings
- ❑ **Link multiple institutions** such as universities, R&D laboratories, industry, technology promotion institutions, policy makers, industry, venture capital agencies, business angels, govt. funding agencies
- ❑ Primarily involve **linking students and faculty with industry** to undertake industry-driven commercialization projects
- ❑ **Incorporate private sector inputs** into the technology transfer process
- ❑ **Tools and platforms** to encourage creation, dissemination and use of knowledge productively
- ❑ **ICT-driven** for seamless access to valuable data and information.

Purpose of Knowledge Networks

- Bridge the information gap
- Exchange valuable information
- Form partnerships
- Foster interaction among users
- Enhance personal learning and collective knowledge
- Make it easier for the private sector to access IP

Benefits of Knowledge Networks

- **Accelerated Knowledge Transfer** - Creating, sharing and applying knowledge
- **Enhance accessibility** - Easier and quicker access to relevant knowledge
- **Cost minimization** - Costs associated with sourcing, and leveraging knowledge are minimized
- **Fostering Linkages** - Brings together people towards achieving a common goal (e.g. technology transfer, licensing, startup creation, joint research projects, etc)

International Knowledge Networks for Technology Transfer

Some examples:

- BRICS Technology Transfer Network (BRICS TTN) - <http://brics-ttn.org>
- Climate Technology Centre and Network (CTCN) - <https://www.ctc-n.org>
- Global Innovation & Technology Alliance (GITA) - <https://www.gita.org.in>
- WIPO GREEN Database
<https://www3.wipo.int/wipogreen/en/>
- Climate Business Innovation Network (CBIN), The World Bank

Strategies for International Participation

Effective participation and use of international knowledge networks would require:

- Establishing a robust and dynamic outreach strategy (online and offline)
- Building and promoting **innovation clusters, technology licensing/transfer offices and TBIs with international operations**
- Capitalizing on **self-advantages** to find a position in the global value chain – **low manufacturing cost**
- Improving technology innovation and **shifting to the high end of value chain**
- Learning from **international experiences** and continuing to improve **managerial skills and expertise**

Source: Tech Monitor, Jul-Sep 2012

Knowledge/Data Sources for Networking

- **S&T databases** – Thompson Reuter’s Web of Science, Scopus database, Google Scholar (open source database), specialized databases in medicine, environmental science, materials, etc
- **Patent/Tech databases** – Sources of patents, technology information
- **Technology updates** and periodicals
- **Trade journals** – Source of new product announcements
- **Business databases**
- **Corporate websites**
- **Online and Offline networks**

APCTT's Web-based Platforms and Tools for Networking

- Asia-Pacific Online NIS Resource Centre (<http://apctt.org/nis/>)
- Technology4SME Database (www.apctt.org)
- Global Technology Databases (www.apctt.org)
- Renewable Energy Technology Database (www.apctt.org)
- Tech Monitor Website (www.techmonitor.net)
- Asia-Pacific Nanotechnology R&D Management Network (<http://apctt.org/nanotech/>)

Asia-Pacific Online NIS Resource Centre

<http://apctt.org/nis/>

The screenshot shows a web browser displaying the website www.apctt.org/nis/. The page features a blue header with navigation links: Home, About APCTT, Focus Areas, Member Countries, Events, Publications & Databases, and Contact us. Below the header, there are logos for APCTT (Asian and Pacific Centre for Transfer of Technology) and ESCAP (United Nations Economic and Social Commission for Asia and the Pacific). The main content area is titled "Asia-Pacific National Innovation Systems Online Resource Centre" and includes a purple navigation bar with links: NIS Home, About Online Resource Centre, Asia Pacific Forum, Capacity Building, Case Studies, and Web Resources. The page is divided into several sections: a search bar, a list of featured topics (Sustainable Energy Strategies, Advanced Fossil Fuel Technologies, Hi-tech Innovation System), a "Policy News" section with a headline "India: Start-Ups Poised to Drive Economic Growth" and a "Read more" link, and three large promotional banners for "Nanotechnology R&D Management Network", "Grassroots Innovation For Inclusive Innovation", and "Technology for SME". The bottom of the page shows a Windows taskbar with various application icons and a system tray displaying the time as 11:12 on 29/10/2017.

Asia-Pacific Online NIS Resource Centre...

- Provide access to information on government policies and support mechanisms that would help NIS actors in transforming their innovations to commercial products or processes.
- Organize training of partner institutions and stakeholders
- Support in designing, developing, managing and maintaining country-specific Online NIS Resource Centres

Technology Intelligence Services of APCTT

<http://www.techmonitor.net>

- **Asia-Pacific Tech Monitor journal**
- **Value Added Technology Information Service (VATIS) Updates** on Waste Management, Food Processing, New and Renewable Energy, Ozone Layer Protection and Biotechnology
- **Focus** – Innovative technologies, Technology trends, Policies, Market, IPR, Innovation management, Technology events, Technology opportunities, etc
- **Target audience** – Policy makers, SMEs, Technology transfer intermediaries, Policy analysts, Researchers, Academia

Asia-Pacific Tech Monitor

VATIS Updates

Appreciate yourself with the latest technological innovations

- Highlights**
- A better fish-bait storage system
 - A process with 90% water recycling
 - A new method of growing mushrooms
 - A new method of growing fish
 - A process to produce fish oil
 - A process to produce fish meal

Appreciate yourself with the latest technological innovations

- Highlights**
- A process to produce fish oil
 - A process to produce fish meal
 - A process to produce fish oil

Facilitates visitors to:

- ✓ Network with potential partners
- ✓ Explore technology and business opportunities
- ✓ Know latest technological developments and events
- ✓ Read articles on technology trends, markets and technology transfer
- ✓ Gain knowledge on innovation management, start-up venture creation, green productivity, etc.

Asia-Pacific Nanotechnology R&D Management Network

<http://apctt.org/nanotech/>

The screenshot shows a web browser window displaying the website <http://apctt.org/nanotech/>. The page features a blue header with navigation links: Home, About APCTT, Focus Areas, Member Countries, Events, Publications & Databases, and Contact us. Below the header, there are logos for APCTT (Asian and Pacific Centre for Transfer of Technology) and ESCAP (United Nations Economic and Social Commission for Asia and the Pacific). A purple banner highlights the "Asia-Pacific Nanotechnology R&D Management Network". Below the banner, a search bar is present, and a welcome message reads: "Welcome to Asia-Pacific Nanotechnology R&D Management Network". The main content area contains a paragraph: "The Asian and Pacific Centre for Transfer of Technology (APCTT) of the United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP) has initiated a project titled, 'Promotion of a regional network among R&D institutions in the Asia-Pacific to strengthen their research and development (R&D) management capacity in new and emerging areas of technology.' This programme of work currently focuses on the nanotechnology sector. A major objective is to create a regional network of R&D institutions working in the area of nanotechnology-based value-added product development." The footer includes four columns of links: ABOUT APCTT (Welcome, Our Organization, General Information, Statute, Location, Contact us), UN LINKS (ESCAP, UNDSO, UN ENERGY, UNIDO, UNFCCC), REGIONAL INSTITUTIONS (APCIT, CAPSA, CSAM, SIAP), and FOLLOW US (with social media icons). A copyright notice at the bottom reads: "© 2016 APCTT, All Rights Reserved | Privacy Policy | Disclaimer".

Focus of Nanotechnology Network

Nanotechnology-based
value added products

Capacity building on
critical aspects of
R&D management

collaboration
between R&D
institutes and

Networking among
R&D institutions

Commercialization of
research results

Information exchange
/ sharing

Sharing of experience
/ best practices

Lessons learned from
case studies

Promoting Regional Cooperation and Networking in Nanotechnology

- APCTT's workshop on nanotechnology R&D management held in 2014 in Tehran, Islamic Republic of Iran led to the **establishment of a tripartite programme** on 'Nanoparticle characterization comparison on nanoparticle size activity' between **Iran, Thailand and Taiwan province of China** under the aegis of Asia Nano Forum (ANF).
- Establish an online Nano-safety Networking Platform for stakeholders in the ASEAN countries in partnership with a national or regional institution
- Facilitate **cross-border sharing of methodologies and testing procedures** related to safety of nano-products
- A key partner institution, the Asian Institute of Technology (AIT) has expressed interest to discuss with APCTT on the formation of an **ASEAN Nanotechnology Association**.

Concluding Remarks

- Participating in knowledge networks is key to acquire up-to-date information and establish linkages and partnerships for innovation and technology commercialization.
- The complex challenges of research commercialization and technology transfer could be addressed through wider networking with stakeholders.
- Universities and research laboratories need to strengthen their industry outreach programmes to bridge the gap with industry
- Participation in international knowledge networks can boost the chances of cross-country technology transfer.
- Web-based platforms and online tools are effective and faster means to facilitate networking and linkages for research commercialization and technology transfer.
